

ODUNAIYA ISRAEL OLUWASEGUN

Pickering, Ontario | (416) 831 4474 | israelodunaiya@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

PROFILE SUMMARY

New Grad software developer with enterprise experience developing NestJS/TypeScript REST APIs, reusable Playwright automation, and Jest test coverage and React full-stack features for a large ERP platform. Experienced collaborating across development, QA and automation teams, delivering and standardizing products. Also shipped apps with Docker, GitHub Actions, Azure Functions, and Cosmos DB. Mentored on Networking & Security and AI generation during my free time.

SKILLS & INTERESTS

- **Languages:** Python, SQL, TypeScript, JavaScript (ES6+), HTML/CSS, Java, C++, C, Angular, Bash, R, Dart, Kotlin
- **Frameworks & Libraries:** Azure, REST API, NestJS, React, Node.js, Tailwind CSS, TensorFlow, Swagger, Flask, Kali, Ubuntu
- **Tools:** VS Code, Docker, Linux, PostgreSQL, Jupyter, SSMS, Visual Studio, Jenkins, IntelliJ, Firebase, R Script, Android Studio
- **Cloud & Testing:** Azure Functions, Azure DevOps, GitHub Actions, CI/CD, Powershell, Git, Playwright, Jest, Pytest, Burp Suite
- **Networking & Security:** Cisco IOS, EVE-NG, VLAN, OSPF, ACL, NAT, DHCP, Fortigate, Palo Alto, Wireshark, IAM, RBAC
- **AI/ML:** OpenAI API, PyTorch, YOLOV8, OpenCV, Hugging Face, Prompt Design, Pandas, Computer Vision, NLP, TensorFlow

EXPERIENCE

Constellation Homebuilder

Jan 2026 - Aug 2026

Software Developer Intern

Markham, Ontario

- Designed, documented and maintained RESTful APIs and OpenAPI, implemented testing strategies authoring over 100 Jest unit spec files and Playwright API/UI with Swagger evidence spec files.
- Built and standardized 20 NestJS REST controllers for 15+ administration resources with TypeScript, Swagger/OpenAPI, and reusable handler patterns, and managed relational data via Java/.NET and SQL.
- Automated Entity and import/export test setup with Python on Linux and extended Playwright coverage for file processing and error paths, reducing manual test-setup work.
- Contributed to the development of AI-assisted application features integrated into existing workflows and used it against existing NestJS patterns to draft controllers, tests, and Swagger docs.
- Collaborated in peer code reviews via Azure DevOps PBIs, and produced integration guides, QA workbooks, and automation handoff documentation, which accelerated developer onboarding and improved QA testing efficiency

PROJECT HIGHLIGHTS

Enterprise Network Security Lab | EVE-NG [Link](#)

Sep 2025 - Aug 2026

Python/R, Pandas, NumPy, Matplotlib/Seaborn, Data Visualization

- Designed and configured an enterprise-style network using Cisco IOS, FortiGate, Palo Alto, Windows Server, and EVE-NG, implementing segmented VLANs, routing, firewall zones, and WAN connectivity, which enabled a fully functional lab environment.
- Built an EVE-NG topology with segmented HQ VLANs, 802.1Q trunks, and EtherChannel, plus a separate management network.
- Configured FortiGate high availability, firewall policies, security zones, and transit, troubleshooting connectivity across devices.
- Troubleshoot L2 & L3 devices with ping, route tables, policy hits, and Wireshark, and documented addressing, configs, and recoveries.

Fitness Analytics Dashboard [Link](#)

Jun 2025 - Aug 2025

React, Application Insights Azure Static Web Apps, Azure Functions, Cosmos DB, CI/CD (GitHub Actions)

- Built a serverless API and dashboard application using React, Azure Static Web Apps, Azure Functions, and Cosmos DB.
- Deployed via Azure Static Web Apps with CI/CD automation, using Azure Functions, Storage, and Cosmos DB for secure serverless backend logic and data tracking while ensuring scalability.

Football Object Tracker [Link](#)

Feb 2025 - Apr 2025

Python, PyTorch, YOLOv5, DeepSORT, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, Jupyter, Collab

- Engineered a YOLOv5 + DeepSORT tracking system (PyTorch, OpenCV) achieving 90%+ mAP for player/ball detection.
- Produced match insights (possession %, player heatmaps, distance/speed stats) and excluded refs with rule-based filters; organized repo (trackers/, team_assigner/, utils/) for reuse. Caching to cut reprocessing time ~30%; with annotated outputs for dashboards /BI.
- Enhanced visualization with Matplotlib & Seaborn, producing interactive dashboards for coaches, analysts, and scouts

CERTIFICATION

- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Azure Data Fundamentals(DP-900)
- Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900)

EDUCATION

University of Ontario Institute of Technology (UOIT)

Sep 2021 - Jun 2025

Bachelor of Science, Computer Science

- **Coursework:** Data structures & Algorithms, Database Management, Sci Data Analysis, Computer Vision, Data Visualization
